**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 3-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Cohn US Pat. 5,760,661.

3. Cohn discloses a circuit comprising a dielectric substrate 100 including a pair of main surfaces: a transmission line 104 disposed on the one of the main surfaces of the dielectric substrate; a ground conductor 102 disposed on the other of the main surfaces of the dielectric substrate; and a capacitance 112 being disposed on the dielectric substrate and connected to the transmission line for setting ad desired delay time of the delay line wherein the capacitance is provided by a varactor (varicap) diode. The

varactor diode well known in the art to function as a variable capacitor. The capacitance is connected in parallel to the transmission line. (See figure 3, column 1 line 63 through column 2 line 2, column 3 line 52-through column 5 lines 33)

***Allowable Subject Matter***

4. Claims 9-14 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: With regards to claim 9, the prior art of record does not disclose or fairly teach the capacitance being adjustable. The closest prior art of record Mandai et al US Pat. 5,436,601 (of record) discloses that the capacitance is substantially fixed. With regards to claim 13, the prior art of record does not disclose or fairly teach the capacitance being a diode.
